OBJECTIVE

Highly skilled and results-driven **Backend Engineer** with over 7 years of experience in designing and implementing scalable ERP systems, SaaS platforms, and microservices architectures. Proven expertise in developing ERP modules (HRM, Warehouse Management) that contributed to ISO certification for charity organizations in Saudi Arabia. Strong background in building and refactoring backend solutions with **PHP, Python, C#, Zend, Laravel, Vue.js, and API integrations**. Adept at applying **SOLID principles, design patterns, and advanced algorithms** to deliver efficient, maintainable, and high-performance systems. Seeking a **Senior Backend Engineer role** to leverage technical expertise, drive innovation, and contribute to the growth and success of forward-thinking organizations.

PROFESSIONAL EXPERIENCE

Vcloud 10/2025 | Las Vegas

Senior back end

Worked as a Backend Developer at VCloud, an AI-driven cloud contact center and communication solutions company providing omnichannel contact center services, pharmaceutical hub solutions, analytics dashboards, and proprietary platforms such as VOCCS.

Responsible for developing and maintaining the Client Portal, enabling clients to dynamically access and visualize their business data. Built scalable dynamic datasets and data sources using PHP, Google Cloud Platform (GCP), and BigQuery to support advanced analytics and client-specific reporting.

Developed dynamic report subscription systems integrated with Power BI and AI-powered features to automate reporting workflows and generate actionable insights. Integrated Twilio services for voice calling capabilities, call handling, transcription, and conversation analysis to improve customer interaction monitoring and operational intelligence.

Also contributed to the company's core contact center platform (VOCCS), which supports enterprise clients including Pfizer and PMS, focusing on backend services, communication workflows, and analytics-driven solutions.

Key Technologies: PHP, Google Cloud Platform (GCP), BigQuery, Power BI, Twilio, AI Integration, Backend Development, Contact Center Systems, Data Analytics, Client Portals, Transcription & Call Analysis.

Forall 10/2023 – present | Cairo, Egypt

Senior back end

- Developed API-driven backend for vendor, sales, clinets, and rider applications similar to Uber. Integrated multiple services across applications and enhanced backend scalability.
- Built a comprehensive admin dashboard to manage cross-functional data, supporting business insights and operational needs.
- working as back end engineer for make mobile app have more than 30 service
- implement some features and working make code more scalable and testable for future majors and good thing, me architecture some services for this project
- with techs php laravel mysql and js

OctopusPro 03/2023 – 10/2023 | Cairo, Egypt

Senior full stack

- Converted legacy full-stack Zend project to a more modern SPA with Vue.js frontend and Zend backend.
- Improved system efficiency, user experience, and project maintainability by restructuring and optimizing architecture
- with implementing new features with techs like php, zend, vuejs, mysql, jquery and laravel.

Afaq (ERP Systems) 06/2021 – 03/2023 | jeddah, Saudi Arabia
Full Stack Developer
- Developed ERP systems for charity organizations, contributing to the company's ISO certification.
- Built and maintained modules including HRM, warehouse management, and implemented new functionalities across departments.
- Collaborated on enhancing existing systems, creating a sustainable, testable, and scalable codebase.
- with techs like php native, js, jquery, mysql and bootstrap.

Prismatecs 01/2020 – 06/2021 | Cairo, Egypt
full stack developer
- Worked on SaaS solutions including a CV generator and website builder.
- Developed core modules such as management systems using maintainable, high-quality code.
- Enhanced system functionality and user experience by ensuring modularity and code optimization.
- Teck stack: php native (oop), javascript, jquery, bootstrap and mysql

Upwork 01/2019 – 01/2020 | giza, Egypt
full stack developer
working as full stack developer to help clients to improve or implement or create some features for own projects

SKILLS

- php
- laravel
- mysql
- js
- Vuejs
- jquery
- bootstrap
- git
- css
- Python
- Java
- C#
- Zend
- agile

COURSES

Agile Software Development 05/2025 – Present
University of Minnesota
Agile Software Development (Coursera – University of Minnesota)
A hands-on course teaching the Agile mindset and frameworks (e.g., Scrum, XP), with modules on Agile principles versus traditional methodologies, Agile values and practices, and real-world application through case studies and assignments. Developed ability to participate effectively in Agile processes, apply Agile values, and solve common adoption challenges.

Data Structures and Algorithms 2025
UC San Diego, California
- **Data Structures (Coursera – part of the Data Structures and Algorithms Specialization)** *A practical and in-depth online course covering core data structures such as arrays, linked lists, stacks, queues, and trees, along with performance analysis topics like dynamic arrays and amortized complexity. Completed multiple programming assignments in C++, Java, and Python, and explored real-world applications such as efficient file handling in systems like Dropbox.*

Algorithmic Toolbox 2024
UC San Diego, California
- Greedy Algorithms, Divide and Conquer, Dynamic Programming
- Problem Solving, Critical Thinking and Mathematics
- Software Testing, Debugging

CS50 2020
EDX

EDUCATION

Ain shams university 2014 – 2019 | Cairo, Egypt
Civil engineering

Institute of computer science Cairo, Egypt
